Date: 9/14/2021

Town of Albion

Dear Board of Selectpersons:

With the new up tick in COVID 19 cases, we, at Sullivan's Waste disposal, are asking that the following requirements stated in our contract for residential curbside pick up be strictly followed in order to protect our employees and comply with our insurance company.

ALL TRASH must be bagged and tied even if it is in a barrel or tote.

NO BAG can weigh over 40 pounds i.e. if you have a barrel or tote that holds 120 pounds of trash you will need three (3) 40 pound bags.

ALL CARDBOARD will have to be broken down and bundled. No loose cardboard will be taken.

Syringes can be disposed of in a capped container, i.e. laundry bottle, coffee creamer bottle, bleach bottle, etc.

No mattresses, box springs, couches, or chairs will be picked up curbside.

If residents have any issues, they should please call the office and should not address or approach our drivers or throwers. The workers may not be wearing face coverings due to fogging issues if they are wearing glasses.

These requests are not outside our contract in which we are operating. We simply have to follow the guidelines that are in place to avoid having our employees handle possibly contaminated materials, handle items that may cause injury, and over exert if lifting bags in excess of 40 pounds.

If you have any questions, please contact Elizabeth Sullivan at 948-2658.

Thank you,
Sullivan's Waste Disposal & Recycling Services, Inc.
